REPORT 02
3 approved findings

01 / EXECUTIVE SUMMARY

A clearer path forward.

This fictional website review records verified lab observations and opportunities for a focused technical review. Business impact requires independent validation.

Fictional demonstration. Every observation refers to the controlled fixture, not a real business website.

02 / DIGITAL HEALTH

72 / 100

Deterministic communication score · 100% category coverage

Category	Score	Calculation
Performance	100	max(0, 100 - 0) × 25 / 100
Accessibility	45	max(0, 100 - 55) × 20 / 100
SEO	73	max(0, 100 - 27) × 20 / 100
Mobile experience	50	max(0, 100 - 50) × 15 / 100
Technical quality	100	max(0, 100 - 0) × 10 / 100
Security headers	60	max(0, 100 - 40) × 10 / 100

Deductions are capped at each category's weight. Missing categories are excluded from the denominator and lower coverage. Scores are not certifications. See the evidence ledger for each deduction.

03 / WORKING WELL

Keep what works.

- **First Contentful Paint**: 60 ms (local lab) `e0835d42`
- **Largest Contentful Paint**: 60 ms (local lab) `f6cb7cda`
- **Cumulative Layout Shift**: 0.000 (local lab) `7c713e32`
- **Observed long-task blocking**: 0 ms during capture `8e9d7429`
- **Response status**: 200 `90300361`

04 / APPROVED FINDINGS

Priorities, with proof.

1 / ACCESSIBILITY · HIGH · 100% CONFIDENCE

Images must have alternative text

The captured page returned: 1 affected elements; rule image-alt. The check expects: Resolve axe rule image-alt; validate manually.

Why it matters. This may create barriers for people using assistive technology. Confirm the impact through manual testing.

Recommendation. Review images must have alternative text on the referenced page. Resolve axe rule image-alt; validate manually. Re-test after implementation.

Effort: Needs scoping. Requires scoping; no price or delivery commitment.

Template-assisted explanation, human approved · Reviewer: Approved for the fictional, controlled sample report.

Assumption: Implementation effort depends on access to the website and its underlying platform.

axe-core 4.10.3 · 2026-10-09T20:26:34.879Z · verified · deduction 8

2 / SEO · MEDIUM · 100% CONFIDENCE

Meta description

The captured page returned: Missing. The check expects: A descriptive meta description.

Why it matters. This is an opportunity to improve the clarity, usability or delivery of the inspected page. Business impact requires separate validation.

Recommendation. Review meta description on the referenced page. A descriptive meta description. Re-test after implementation.

Effort: Needs scoping. Requires scoping; no price or delivery commitment.

Template-assisted explanation, human approved · Reviewer: Approved for the fictional, controlled sample report.

Assumption: Implementation effort depends on access to the website and its underlying platform.

3 / MOBILE EXPERIENCE · HIGH · 100% CONFIDENCE

Horizontal mobile overflow

The captured page returned: 314 px beyond the viewport. The check expects: 0 px horizontal overflow.

Why it matters. This is an opportunity to improve the clarity, usability or delivery of the inspected page. Business impact requires separate validation.

Recommendation. Review horizontal mobile overflow on the referenced page. 0 px horizontal overflow. Re-test after implementation.

Effort: Needs scoping. Requires scoping; no price or delivery commitment.

Template-assisted explanation, human approved · Reviewer: Approved for the fictional, controlled sample report.

Assumption: Implementation effort depends on access to the website and its underlying platform.

05 / IMPLEMENTATION PLAN

Start small. Verify the change.

1. **Confirm.** Review the approved observations against the live site with its owner; agree on scope and access.
2. **Improve.** Address high-severity findings first, then group related work by page and service.
3. **Validate.** Repeat measurements and conduct manual accessibility and mobile checks. Compare evidence under equivalent conditions.

No implementation dates, prices or commercial outcomes are implied.

06 / PROPOSED SERVICES

A focused engagement.

- Accessible interfaces
- Technical SEO

Suggested next step

A short discovery conversation to confirm priorities, constraints and an appropriate scope.

Independent consultant · hello@example.com

07 / METHODOLOGY & LIMITATIONS

Evidence before opinion.

Captured 1 controlled public fixture pages with isolated Chromium, axe-core and deterministic DOM checks. Browser performance values are single-run, unthrottled local lab measurements, not real-user field data. Lighthouse, Speed Index and standardized Total Blocking Time were not measured.

Verified evidence records describe observed values. Deterministic scores use the saved weights. Template-assisted explanations and manual reviewer notes are interpretations. Heuristic checks and assumptions require manual verification. Automated checks cannot establish complete accessibility, security or usability.

This limited automated review describes observations from controlled lab captures. It is not a security assessment, accessibility certification or guarantee of commercial results. All demo companies and data are fictional.
